Welcome to the Sawmill

The Sawmill derives its name from its original purpose as the sawmill for the local area. Many years ago, this busy farm would see horse drawn carts bringing wood through to a centre well which underlies this restaurant floor where you are seated, and wood would be hand sawn.

The other lower courtyard buildings which you can view from the restaurant windows were traditional workshops for various skilled tradesmen, such as Blacksmiths, Farriers and Carpenters, overseen by the Foreman of the yard. The beautiful bedrooms in which you now reside, once housed forges and steam driven machinery.
